

# „No Harm to Network – Plus“

Validate DTAG IoT connectivity requirements.

- **Verification of mandatory Deutsche Telekom requirement:**  
**‘No Harm to Network IoT Device Applications’:**
  - Keep alive messaging
  - Connection retry mechanisms
  - Always-on connectivity
  - Avoidance of signaling storms
  - Watchdog timer implementation and functionality
  - Behavior upon sudden signal coverage loss
  - Recovery upon receiving detach command from network
  - Remote Firmware update process
  - Mode-switching (Cat-M <--> NB-IoT <--> legacy LTE)
- **Testing service tailored for devices without RPM (GSMA TS.34)**
- **Support in troubleshooting for observed issues with proposals for corrective actions**
