ORBIT Software Development

As individual as your processes

As implementers of the IoT Solution Optimizer, we are used to map complex business requirements into applications with the highest usability. We provide you with:

- » Uncompromised mapping of your business processes

- » High security and modern usability

- » High-performance handling of Big Data

- » Compliance with legal regulations (e. g. DSGVO)

- » Focus on standard technologies such as .NET Core, ASP.NET MVC (Microsoft) and Angular

- » On-Premises and On-Azure

- » Web and mobile

- » A wide range of services far beyond pure programming
  (e.g. project management, requirements engineering, data analytics, quality assurance, service desk, and much more)
