

Antenna Characterization Benefits

Custom-tailored

- Use case-dependent characterization suites proposed and priced
 - Pattern
 - Efficiency
 - Return loss
 - Gain (active or passive mode)
- Upgrade options available

Facilities

- State-of-the-art facilities for SISO and MIMO antenna characterization
- DEKRA is ISO17025 accredited laboratory for CTIA/3GPP Antenna Performance Testing

Conformance

- Antenna Characterization helps manufacturers comply with Antenna performance requirements including:
 - Deutsche Telekom
 - PTCRB

Improve Business Case

- Understand how to improve your design for better network coverage and service availability
- Identify potential first points of failure
- Obtain expert recommendation on design improvements

Offered in partnership with Deutsche Telekom IoT
