# 2G/3G Migration Support: Benefits

DEKRA

Custom-tailored

- 2G/3G Migration Support is adapted to the features and use cases of the IoT device & service
- Risk assessment-based consultancy scoping (based on gap analysis)
- Upgrade options available

Facilities

- Laboratory equipment and trained staff help testing the candidate technologies and prototype & production migrated devices
- Experts in regulatory and industry certification provide support to ensure nothing is missing in the migration path
- Technology experts provide training on new technologies and support to choose the right option

Conformance

- 2G/3G Migration Support ensures conformance of migrated solution to regulatory, industry and DT IoT requirements

Improve Business Case

- Understand how to improve your design to ensure that the IoT device behaves as expected
- Identify potential first points of failure and obtain expert recommendation on design improvements

Offered in partnership with Deutsche Telekom IoT
